

Shrestha

FRONTEND DEVELOPER · UI DESIGNER · AI BUILDER

- iamshresthax@gmail.com
- Darbhanga, Bihar, India
- shresthaxcoder.github.io
- github.com/ShresthaXcoder

PROFILE

Self-taught **frontend developer and UI designer** with 3+ years of hands-on experience building web applications, interactive experiences and AI-integrated interfaces. Designed and shipped **45+ projects** — from browser games and 3D simulators to a full AI-supported browser concept. Strong focus on **design systems, animation and product thinking**, working end-to-end from concept and UI design to clean, hand-written code.

SKILLS

Frontend

- HTML5
- CSS3
- JavaScript (ES6+)
- React
- Responsive Design

UI / UX

- Design Systems
- Interaction Design
- Motion & Animation
- Typography

Backend & Tools

- Python
- Node.js
- Flask
- REST APIs
- Git & GitHub

AI

- Prompt Engineering
- LLM API Integration
- AI-assisted Workflows

SELECTED PROJECTS

MyDaksha — AI-Supported Browser

Flagship · In Development

Designed and building an AI-first browser that understands pages instead of just displaying them — one-click page summaries, self-organising tab clusters, voice command mode and a distraction-free focus mode.

HTML · CSS · JavaScript · AI Integration

CYBER/UI Kit

Design System

A reusable cyberpunk component library with 40+ components and zero dependencies — CSS-only glitch, scanline and HUD effects, dark-first design tokens, fully themeable.

CSS Architecture · Design Tokens

Weather.Now

Live App

A weather application where the interface reacts to real conditions — animated sky with sun, drifting clouds, rain, lightning, snow and fog, driven by live temperature, humidity and wind data.

JavaScript · REST API · Canvas Animation

ISRO Mission Dashboard

Live Dashboard

A ground-station style console for India's space programme — live launch countdowns to the second, a filterable archive of real missions, and an IST clock with offline fallback.

JavaScript · Data Visualisation

Indian Train Simulator & 3D Games

Game Development

A realistic 3D train-driving simulator (WAP-7 class) plus 8+ hand-coded arcade games and a 3D Rubik's Cube with AI scramble and solve detection — all built without external libraries.

JavaScript · Canvas · 3D Math

EDUCATION

Secondary School — Class 9 (in progress)

Present

Darbhanga, Bihar, India

Self-Taught Programming

Since age 11

HTML · CSS · JavaScript · React · Python — project-based learning
